**Product Overview**

The nRF52 Preview DK is a single-board development kit for Bluetooth® Smart, ANT and 2.4GHz proprietary applications using the nRF52 Series SoC. This kit supports development for nRF52832 SoC.

The kit is compatible with the Arduino Uno Revision 3 standard, making it possible to use 3rd-party shield that are compatible to this standard with the kit.

It supports the standard Nordic tool-chain software using Keil, IAR and GCC. Program/Debug option is Segger J-Link OB for standard tool-chain. The kit gives access to all I/O and interfaces via connectors and has 4 LEDs and 4 buttons which are user-programmable.

A range of software examples are available from the nRF52 Software Development Kit (SDK) to support Bluetooth Smart, ANT and 2.4GHz applications.

**APPLICATIONS**

- Internet of Things (IoT) - Sensors and Hubs
- Wearables – Sensors and Hubs
- Appcessories – Sensors and Hubs
- Desktop peripherals
- Remote controls
- Sports & Medical
- Smartwatch
- Smarthome sensors
- Toys
- Industrial sensors
- A4WP wireless charging control

**KIT CONTENT**

- nRF52 Preview DK board
- 2032 battery
- NFC antenna
nRF52 Series software architecture
The nRF52 Series software architecture offers a clean separation between application code and Nordic’s embedded protocol stacks (called SoftDevices). This means compile, link and run-time dependencies with the protocol stack and associated de-bugging challenges are removed. Application code can be developed and compiled independently of the protocol stack. This simplifies overall development efforts and reduces the possibility and complexity of bugs during development.

SoftDevices
The nRF52 Preview DK is supported by a range of protocol stacks. These Nordic protocol stacks are known as SoftDevices and complement the nRF52 Series SoCs. SoftDevices can support Bluetooth Smart, ANT and Bluetooth Smart/ANT combinations. SoftDevices are pre-compiled binary files for nRF52 Series SoCs and are available from Nordic Semiconductor as downloads. This brings maximum flexibility to application development and allows the latest stack version and associated features to be programmed into the nRF52 Series SoC.

The nRF52 Preview DK is available from the following online partners:

ARROW ELECTRONICS
MOUSER ELECTRONICS
RUTRONIK

nRF52 Series Software Development Kit
The nRF52 Software Development Kit (SDK) is available from Nordic Semiconductor to support the nRF52 Series SoCs. The nRF52 SDK contains a wide range of software modules, complete examples and useful utilities. The nRF52 SDK is a great starting point for beginning building your applications.

SoftDevices and the nRF52 SDK are available to download at www.nordicsemi.com

Nordic offers support for the following:

- Keil MDK
- IAR Workbench
- GCC

About Arduino Uno Rev 3 connector standard
The Arduino Uno Rev. 3 is a popular HW format for simple, rapid prototyping using Arduino Uno compatible shields. Shields conforming to the Arduino Uno Rev. 3 standard can be used with the nRF52 Preview DK.
